Topics to be covered:

- Understanding the Germ theory of disease
- The microbiome and its relationship to:
 - The brain
 - Depression / anxiety disorders
 - Sleep disorders
 - Weight control
- Miasmatic influence of your microbiome and how to use homeopathy to change it
- How your mother affected your gut flora
- Changing your microbiome through diet
- The role of gut health in obesity and diabetes:
 - How to optimise your microbiome to promote leanness, and reduce blood glucose and fat gain
- TLR5 – how it affects absorption and deposition of fat and how to make more of it
- Faecal Microbiota Transplantation (FMT) – when is it really necessary?

The day will include practical demonstrations on applying this information in a clinical environment.

Guest Speaker - Tracy S Gates

We are pleased to welcome Tracy S Gates for this day of seminars alongside our AGM.

Tracy S. Gates is a registered osteopath of 31 years standing. Having practised for several years using osteopathy and cranial osteopathy, she studied Applied Kinesiology, successfully achieving her diplomate status in 1994.

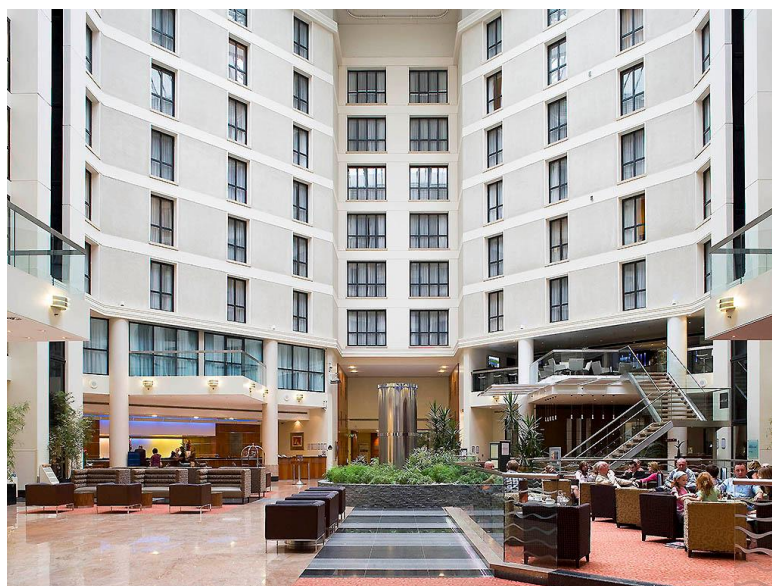

As part of her diplomate she made a research study into the use of AK in treating Special Needs children. The research was backed up by a period of time spent at the Peto Institute in Budapest; and study at the Institute for Research into Human Potential in Philadelphia. Today, Tracy lectures in the UK and throughout Europe.
